

# SEDIMENTARY ROCKS

## Deni Rocks

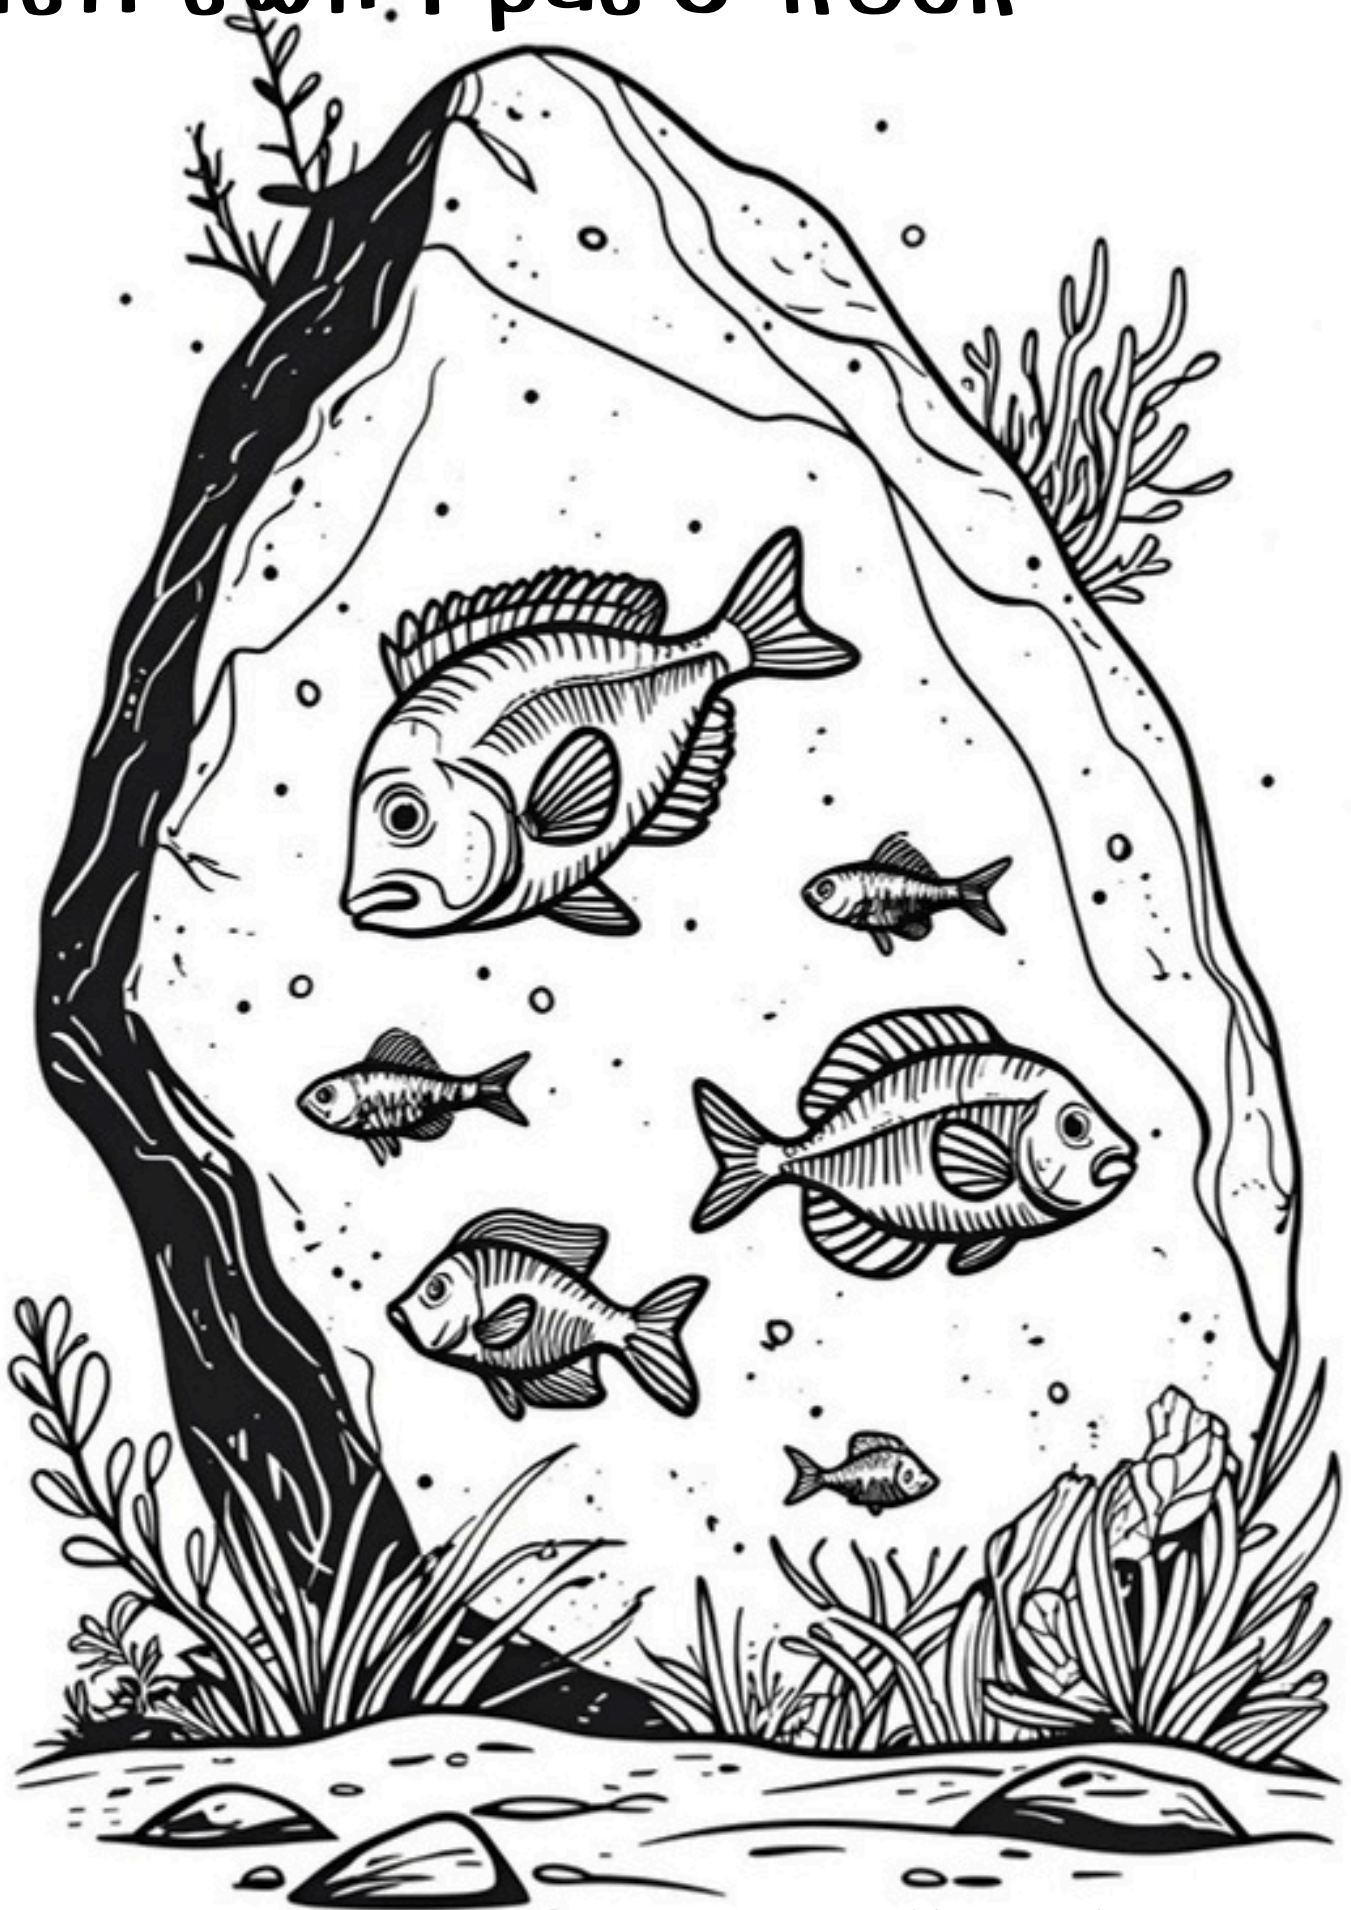

Tallen Families Stories 2025

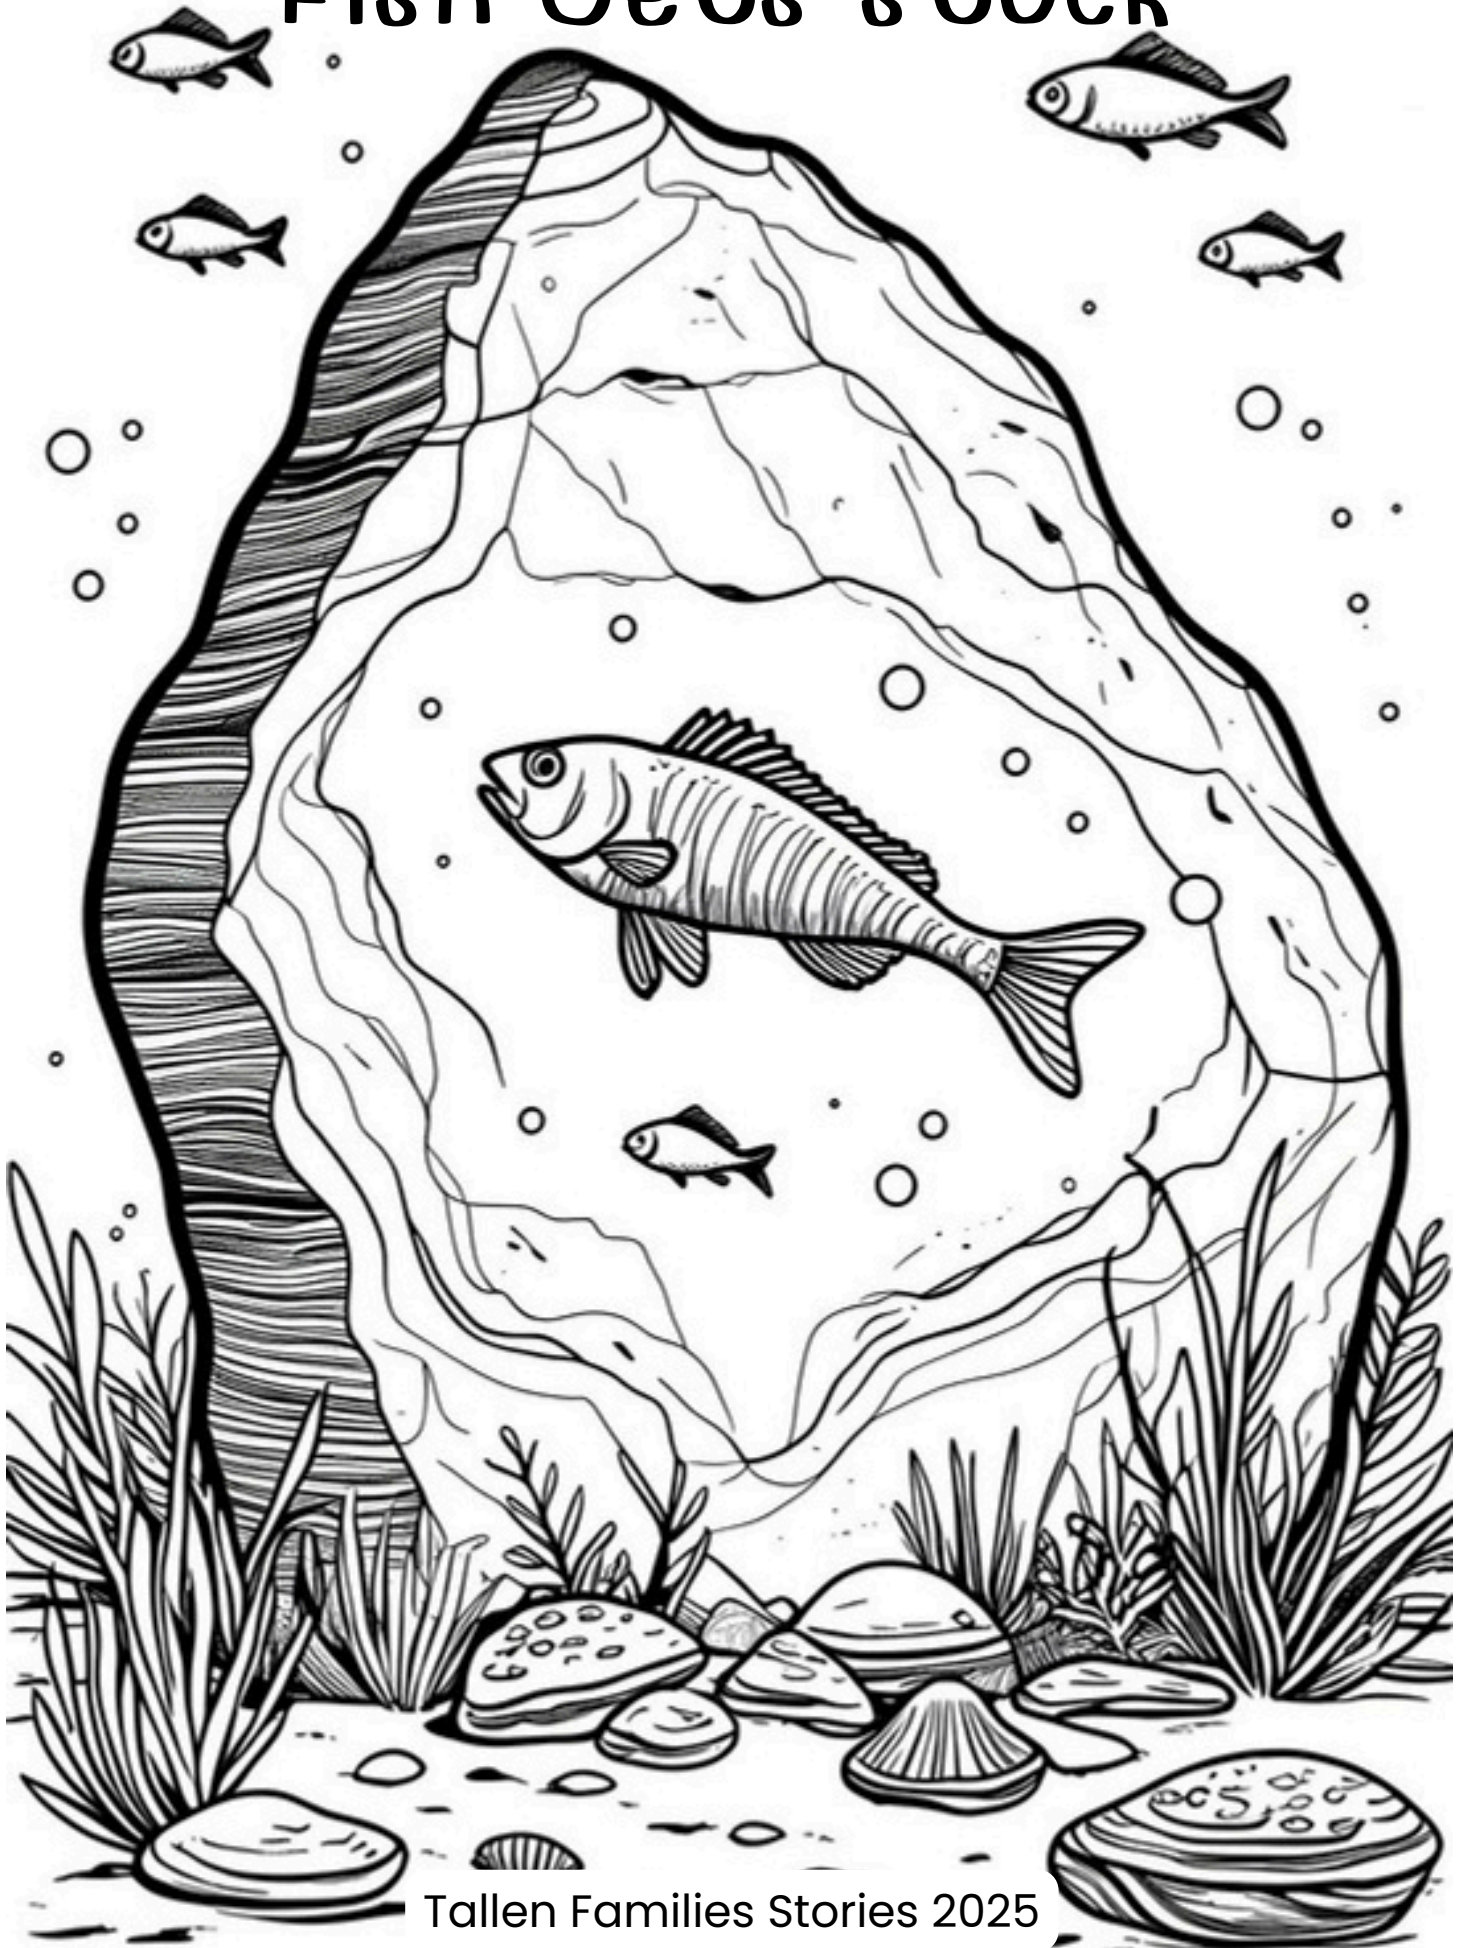

# TFS Fossils in Slate

# Fish swim past Rock

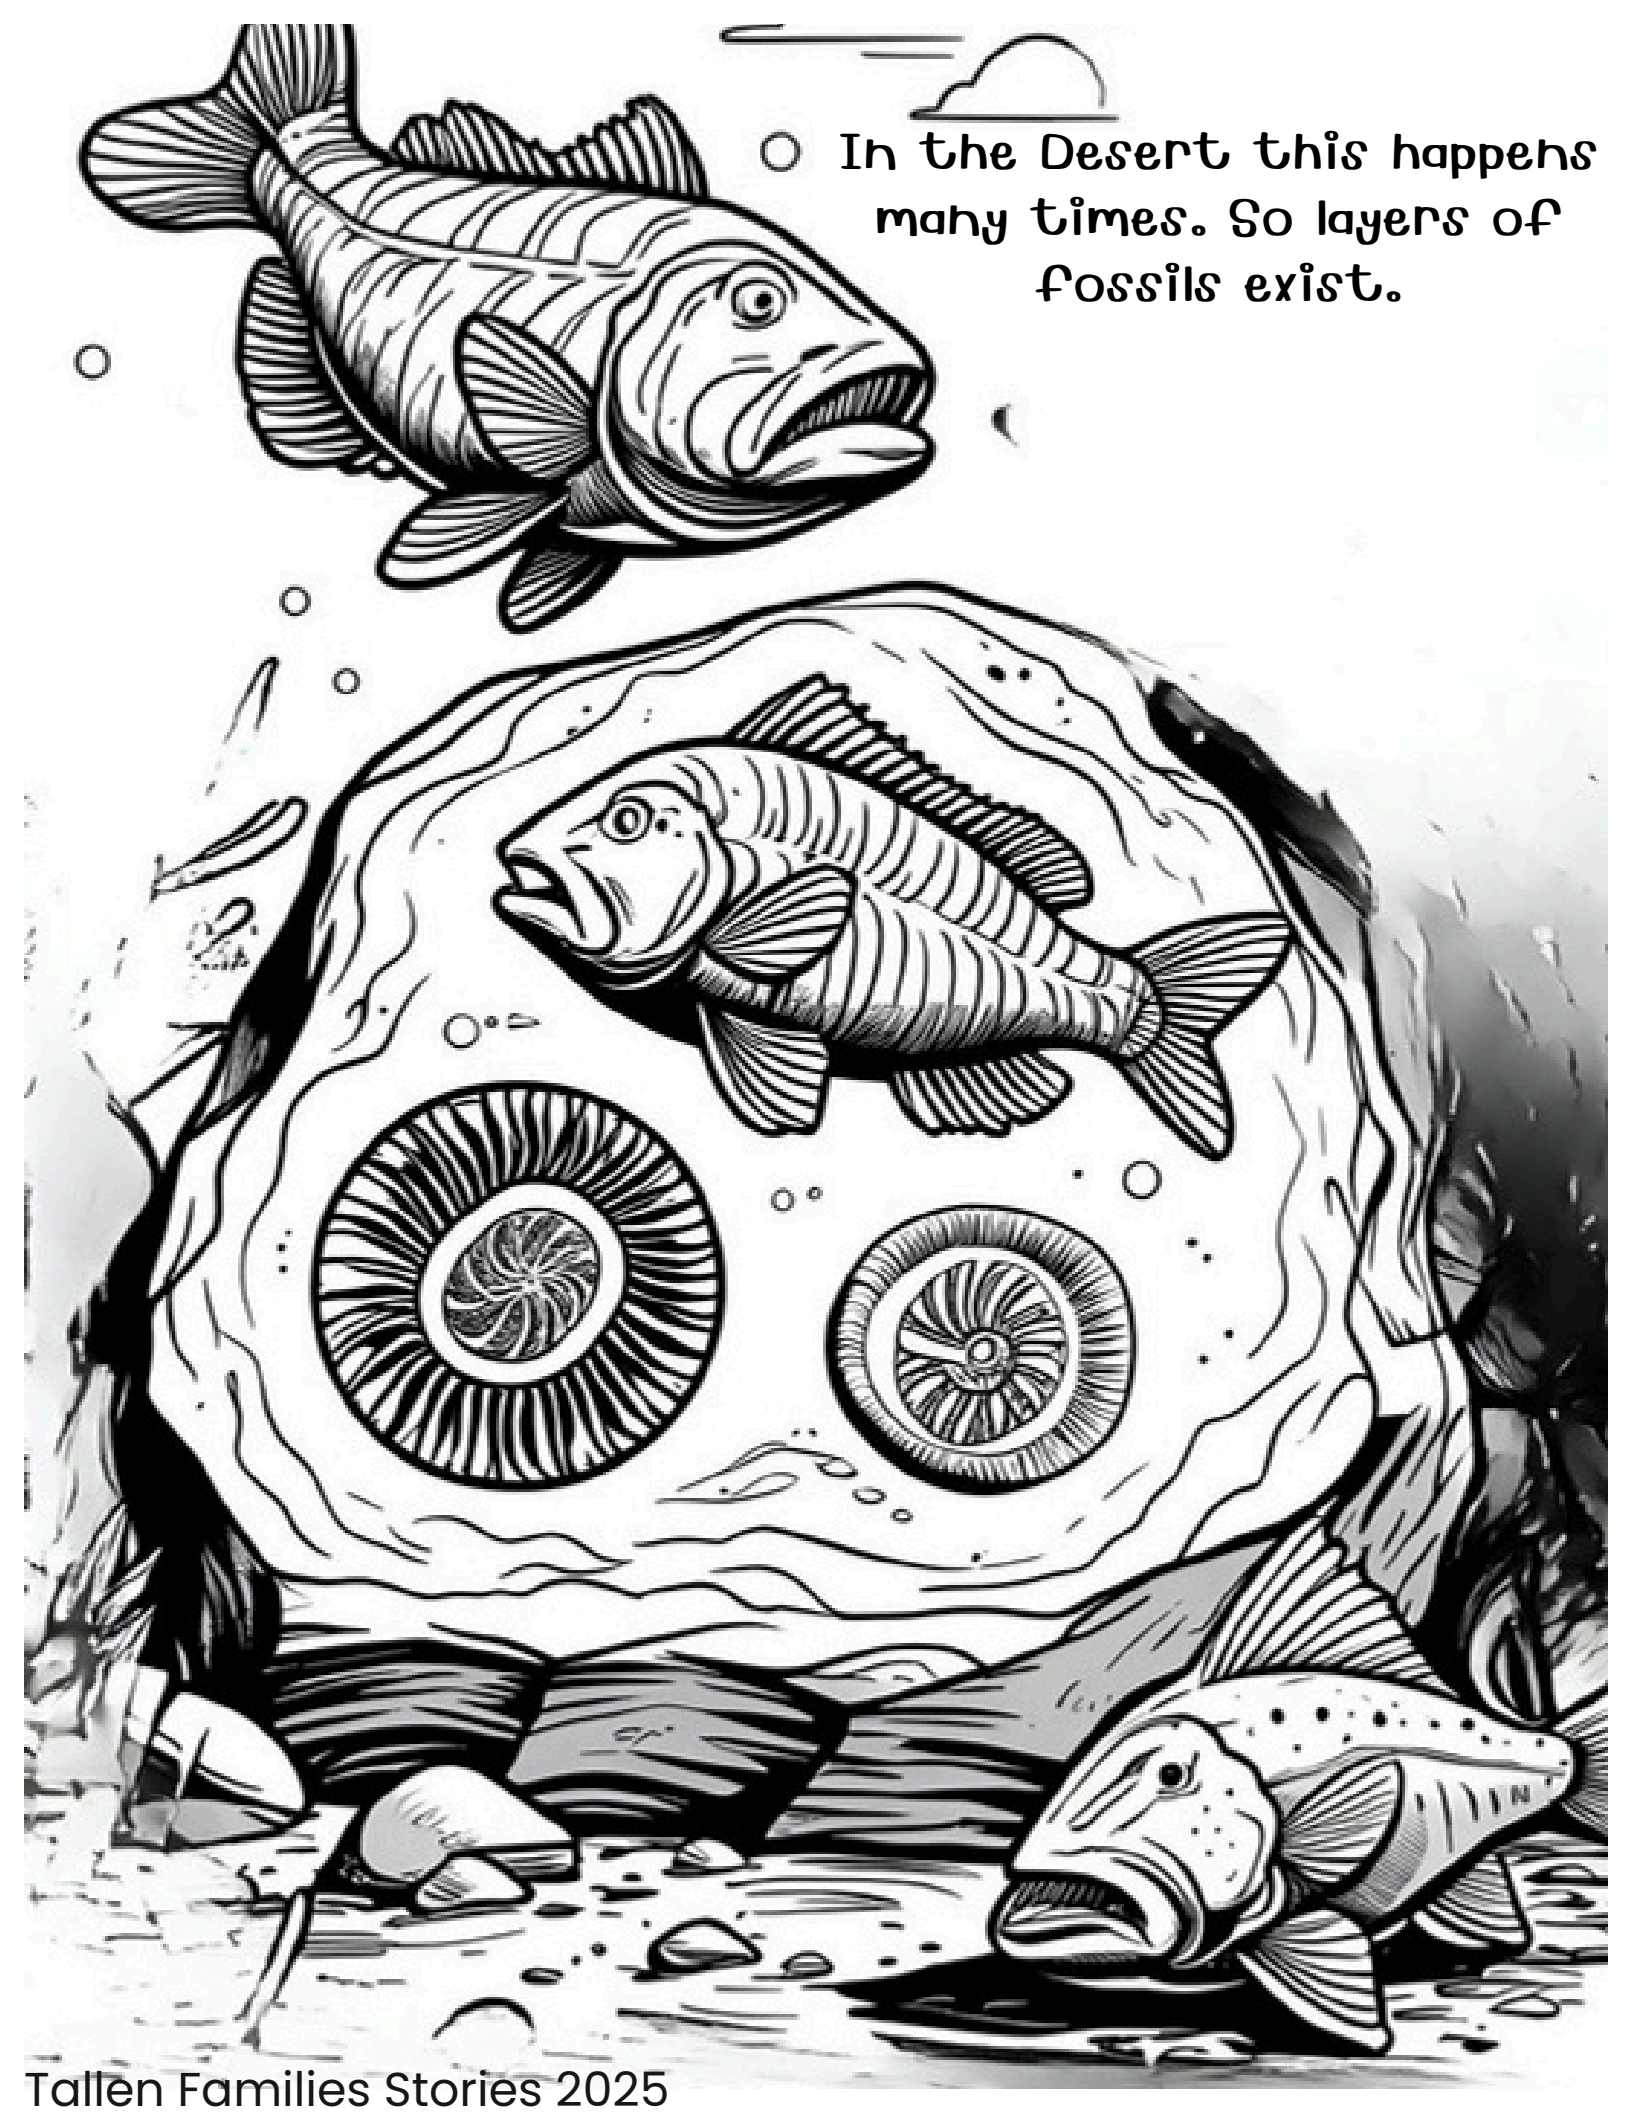

# Fish Gets stuck

The water all  
dries.

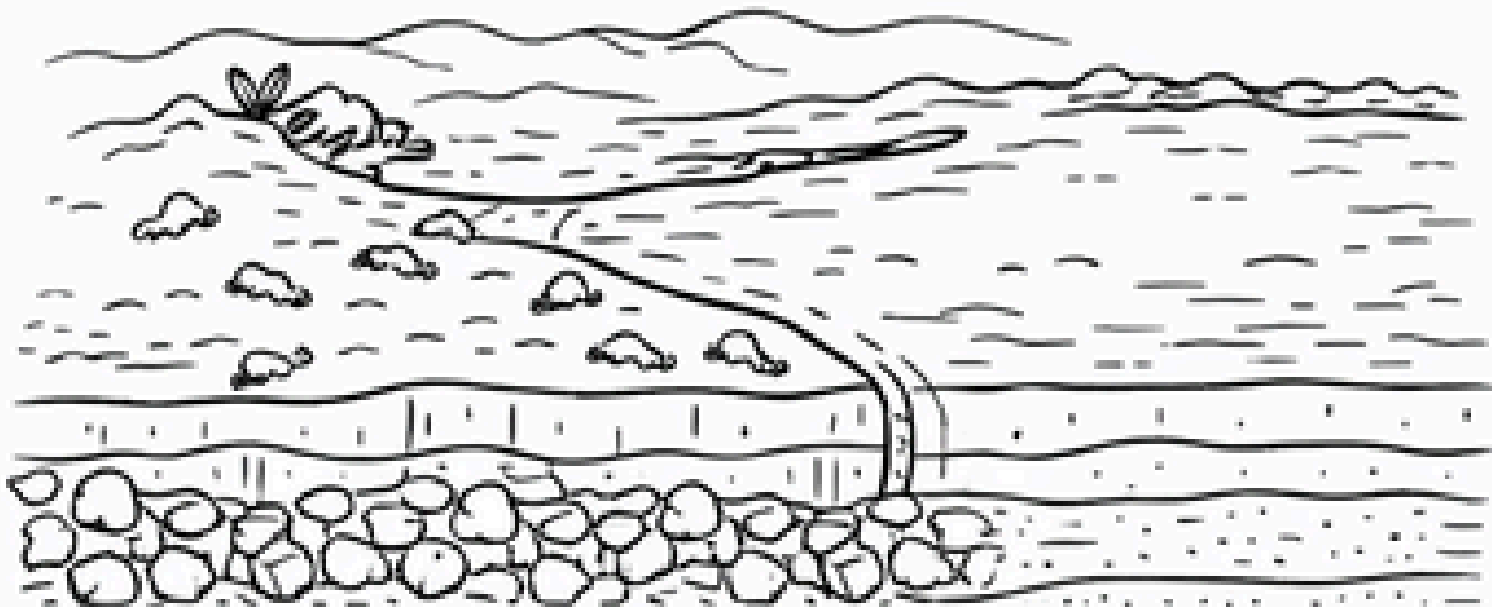

○ In the Desert this happens many times. So layers of fossils exist.

# How Are Sedimentary Rocks Formed?

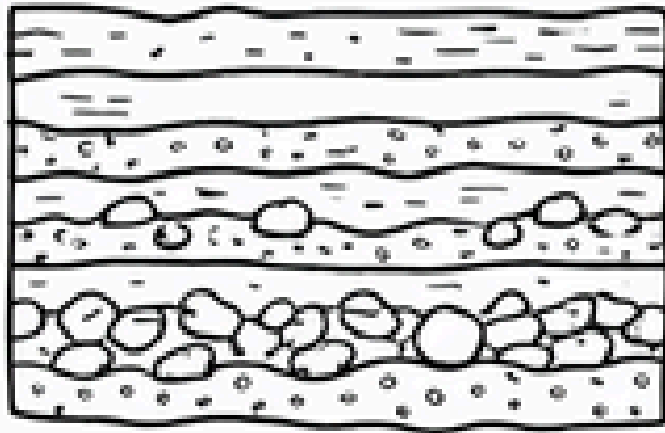

1. Rocks are broken up by weathering and erosion.

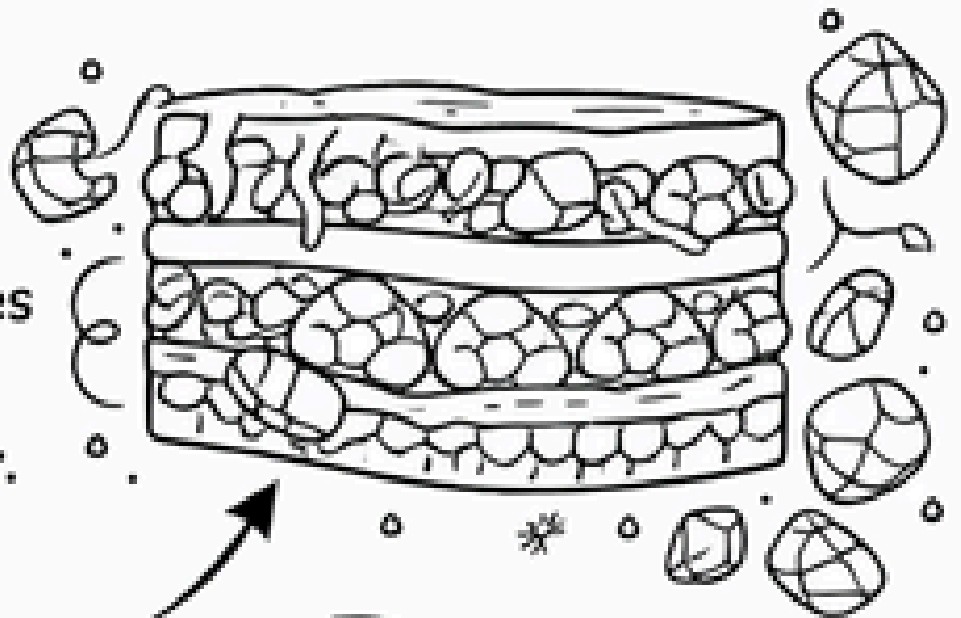

2. Sediments are carried by water and deposited in lakes, rivers, ead. and. oceans.

# How Are Sedimentary Rocks Formed?

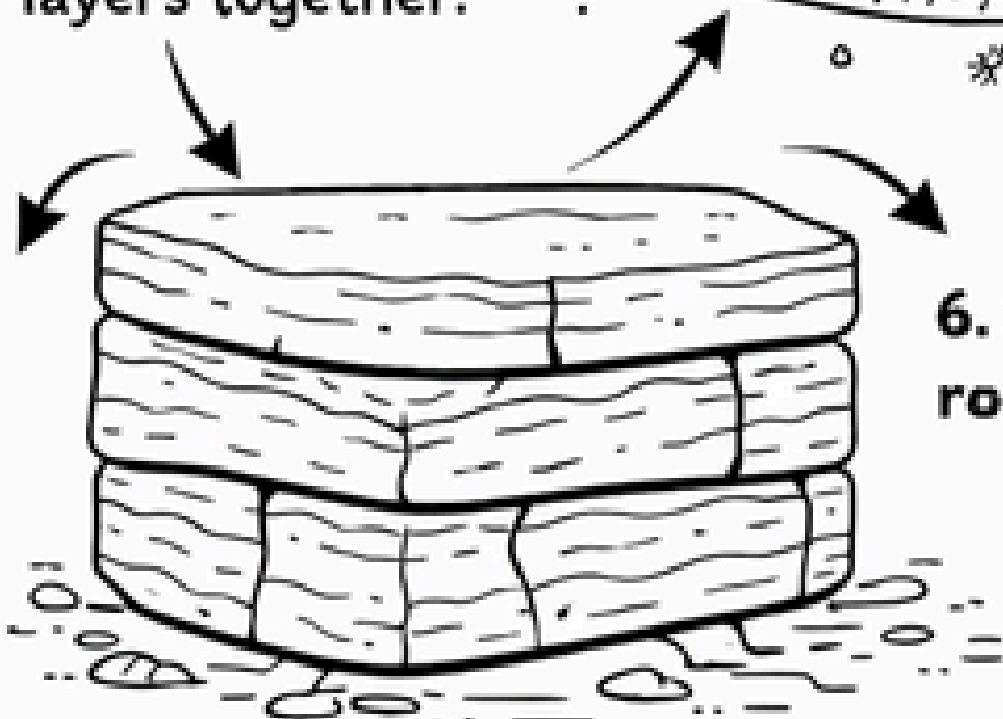

4. Over time, layers of sediment are squeezed together.

5. Minerals fill in the gaps between particles and "glue" the layers together.

6. Sedimentary rock is formed!
